Other (please elaborate):	Count
No real change	2
no change	2
A little. but Food is the main culprit	1
Haven't changed	1
Haven't changed anything	1
Haven't done anything different	1
I am not your typical type 2, I was already active, good diet & health weight & BMI, but required tablets to control and continue my usual regime. I do not tell others because of the stigma attached to it	1
I battle with taking medication constantly	1
I changed eating habits, commence gym, rely on HB1ac, take various medications	1
I don't really remember not being diabetic I was diagnosed at 11 years old	1
I dont remember before i was diagnosed	1
I had a gastric sleeve to help with weight loss which has helped me alot	1
I have a daily pill regime	1
I honestly dont feel any different	1
I knos I'm insulin resutant, which means my body us confused about what insulin is telling it to do. U am actively losing weight anx taking various medications to manage it but still fall off the wagon because it doesn't feel too serious do	1
I struggle to maintain a steady blood level	1
I tried adjusting diet and increasing exercise between being pre-diabetic and being diagnosed, so now I just don't bother and just take the medication and do a daily blood test in the morning	1
I'm being medicated	1
I've changed the way I eat and excercise.	1
I've had it for so long now that I have other health problems as well however I don't manage it properly because I don't want my life to change too much.	1
Totals	63

Other (please elaborate):	Count
I've known no different life	1
It has altered for the BETTER! I have changed what & how much I eat and, as a result, have lost 40 kgs!!! I still do have concerns about long-term heart health conditions.	1
It's all I've ever known	1
Mine is mild so little change.	1
My life has not changed	1
My parents have it so lifestyle remained the same	1
No change	1
No major change just get on with it	1
No problems	1
No real concern.	1
Not much changed	1
Not worried	1
Nothing has changed	1
Nothing has really changed	1
Other than diet, not much has changed	1
Regularly in contact with my GP who organises the required blood tests	1
Small changes thats all.	1
Take medication and watch what I eat	1
Take medication, watch my diet and exercise.	1
Taking additional medication	1
Under control with Metformin medication	1
acceptance	1
Totals	63

Other (please elaborate):	Count
all the above	1
as i eat healthy my DR has stated heriedity so i try to do better	1
carried on with exercise and healthy diet	1
had it nearly 50 years, don't remember	1
it really hasnt changed	1
it's just 2 more tablets i have to take	1
just got on with life	1
moving on with medications	1
no changes at all	1
not changed	1
not much as I have other problems as well	1
not much at all	1
not really apart from eat less sugar	1
not really changed but accepted it	1
not sure	1
not too worried	1
nothing has changed	1
some of the above points - mixed	1
things changed initially, but now it seems I have gotten slack and am not as careful as I should be	1
Totals	63

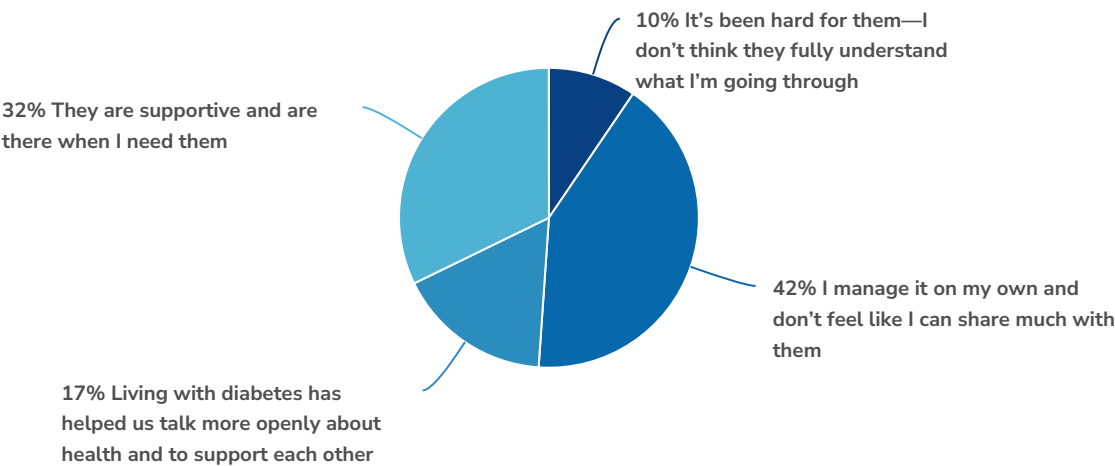

9. How has living with diabetes impacted you financially?

Value	Percent	Responses
It has not affected me financially at all.	30.5% <div><div></div></div>	617
It has resulted in some additional expenses and impacted my finances slightly	51.9% <div><div></div></div>	1,049
It has led to considerable financial strain	10.0% <div><div></div></div>	203
I have been able to manage expenses through subsidies, support programs, or careful budgeting	7.5% <div><div></div></div>	151

Totals: 2,020

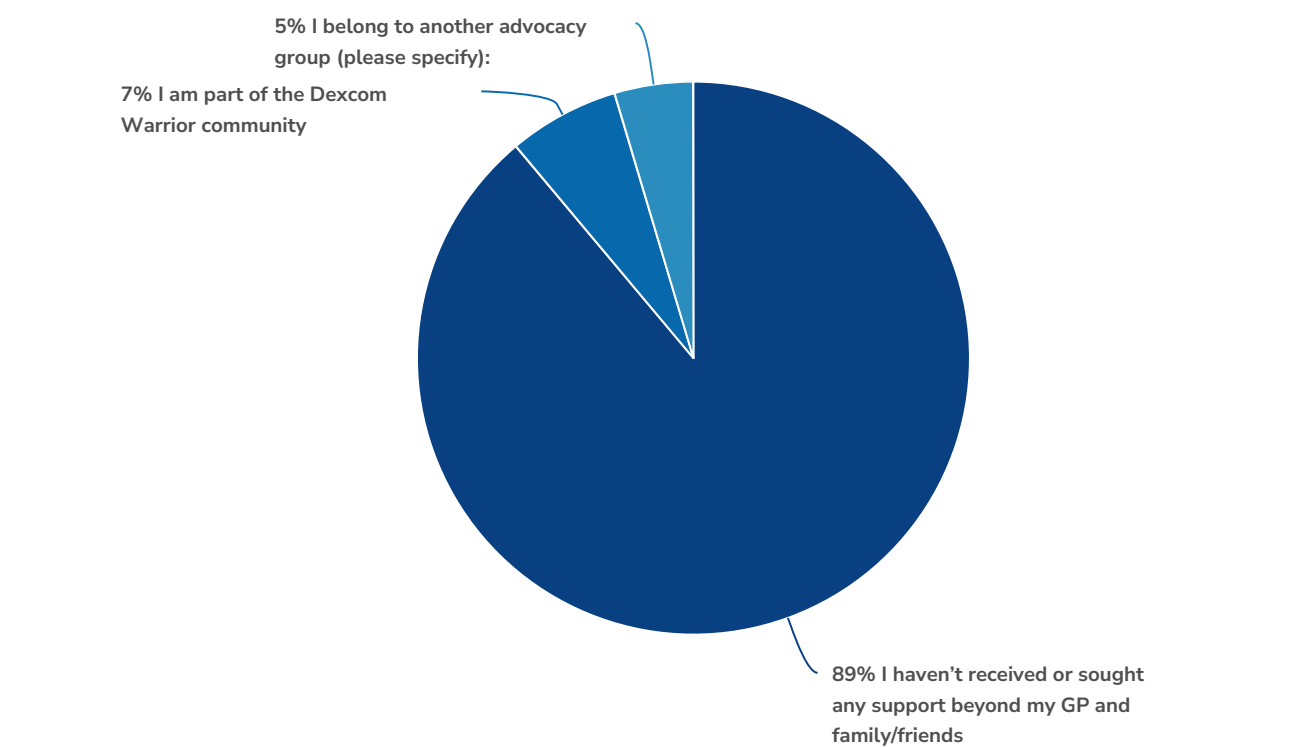

10. How does living with diabetes impact your friends and family?

Value	Percent	Responses
It's been hard for them—I don't think they fully understand what I'm going through	9.5%	192
I manage it on my own and don't feel like I can share much with them	41.6%	840
Living with diabetes has helped us talk more openly about health and to support each other	16.7%	338
They are supportive and are there when I need them	32.2%	650

Totals: 2,020

11. Do you get support from, or belong to, any advocacy groups?

12. Do you openly speak about your diabetes with others?

Value	Percent	Responses
Yes – I talk about it freely and often	31.0%	627
Sometimes – I talk about it with people I trust or when it's relevant	40.0%	808
Rarely – I only talk about it if I absolutely have to	20.6%	416
No – I actively avoid talking about it	7.3%	148
I used to avoid it, but I'm starting to feel more confident speaking up	1.0%	21

Totals: 2,020

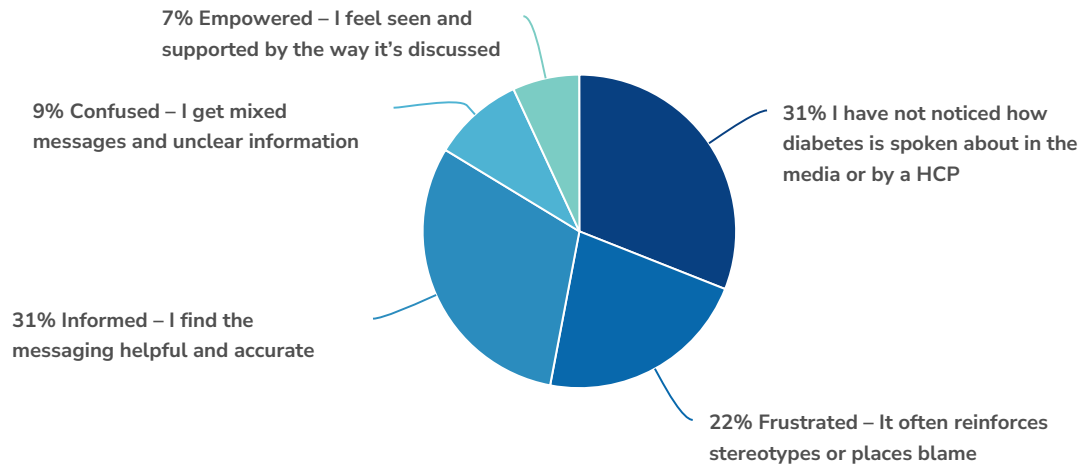

13. Are you connected with a GP, endocrinologist, or healthcare team for your diabetes care?

Value	Percent	Responses
Yes – I have regular check-ins and feel supported by my healthcare team	61.2% <div><div></div></div>	1,236
I see a GP or specialist when needed, but not on a regular basis	33.0% <div><div></div></div>	666
I've had a negative experience and don't feel comfortable seeking care	2.4% <div><div></div></div>	49
I'm not currently connected with a GP, endocrinologist, or diabetes healthcare team	2.8% <div><div></div></div>	57
I feel there is a stigma attached to my condition, so I don't seek health care unless I absolutely need it	0.6% <div><div></div></div>	12

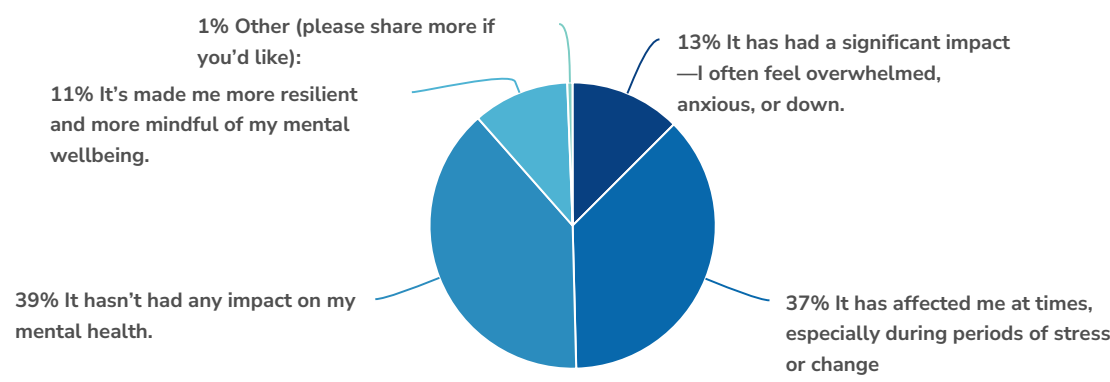

Totals: 2,020

14. How do you feel about the way diabetes is spoken about in the media or by health professionals?

Value	Percent	Responses
I have not noticed how diabetes is spoken about in the media or by a HCP	31.0% <div><div></div></div>	626
Frustrated – It often reinforces stereotypes or places blame	22.0% <div><div></div></div>	444
Informed – I find the messaging helpful and accurate	30.7% <div><div></div></div>	621
Confused – I get mixed messages and unclear information	9.4% <div><div></div></div>	189
Empowered – I feel seen and supported by the way it's discussed	6.9% <div><div></div></div>	140
Totals: 2,020		

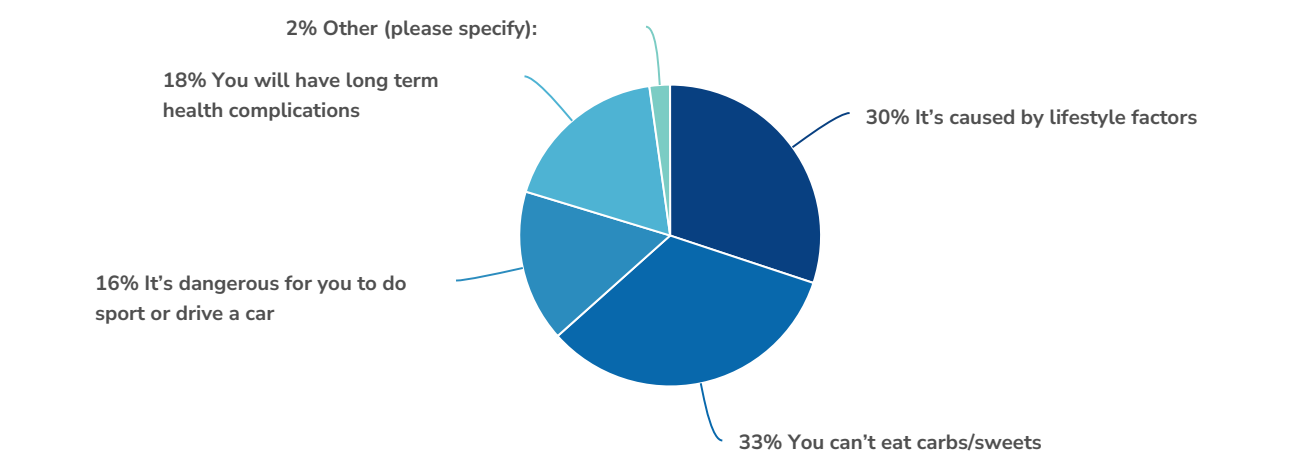

15. How has living with diabetes impacted your mental health?

Value	Percent	Responses
It has had a significant impact—I often feel overwhelmed, anxious, or down.	12.5% <div><div></div></div>	253
It has affected me at times, especially during periods of stress or change	37.1% <div><div></div></div>	749
It hasn't had any impact on my mental health.	38.9% <div><div></div></div>	785
It's made me more resilient and more mindful of my mental wellbeing.	10.9% <div><div></div></div>	220
Other (please share more if you'd like):	0.6% <div><div></div></div>	13
Totals: 2,020		

Other (please share more if you'd like):	Count
Before I was diagnosed it affected me but now no so much.	1
Have learnt to live with it, no option really	1
I just get on with my life.	1
I miss food	1
It has affected me at times when I become concerned about its affect on my heart health.	1
It hasn't impacted too much except when the dentist told me diabetics often take longer to heal I thought, wow this is my life now and I felt down a bit	1
Stinging Burning Toes feet aching legs @ night.	1
The actual diabetes has not affected my mental health.	1
The side effects of medications have created frustration and impacted my mental wellbeing	1
Trying to find which medication helps the most is so frustrating	1
Unsure as I have a mental illness as well. So are they comorbidities?	1
made me aware I will have a shortened quality life.	1
none	1
Totals	13

16. What do you think is the biggest misconception around living with diabetes?

Value	Percent	Responses
It's caused by lifestyle factors	30.1% <div> <div></div> <div></div> </div>	608
You can't eat carbs/sweets	33.3% <div> <div></div> <div></div> </div>	673
It's dangerous for you to do sport or drive a car	16.3% <div> <div></div> <div></div> </div>	329
You will have long term health complications	18.1% <div> <div></div> <div></div> </div>	365

All of the above and that type 1 is the same as type 2 COMPLETELY DIFFERENT	1
Totals	45

Other (please specify):	Count
All the above equally	1
Being aware of my limitations	1
Doesn't effects me at all	1
Don't know.	1
Eating sugary foods will give you diabetes	1
From my point of view there are no misconceptions	1
I am not sure	1
I don't really know	1
I have not noticed any misconceptions	1
I really have no idea	1
I think few people actually understand that it impacts every single area of life, health, emotions, pregnancy, how you function on a day to day basis, moods, socialising	1
I thought you had to be fat to get it.	1
I'm not aware of any	1
Im just a person , like everyone else	1
It is only caused by being overweight	1
Must avoid sugar food	1
No idea	1
None.	1
Not sure	1
Over weight caused diabetes	1
People don't take it seriously.	1
Totals	45

Other (please specify):	Count
People don't understand the difference between Type 1 and 2. The distinction is rarely made in the media and when talking about the negatives of type 2 (cost, complications, reversibility) the media simply refers to 'Diabetes'. Hugely mis representative and irritating.	1
Sick of being told everything relates back to mental health. Grow up ppl! Get on with it stop being all about sick.think positive NOT negative	1
That all forms of diabetes are cause by overindulgence in high carb food.	1
That it is not a serious disease	1
That lifestyle needs total change	1
That type 2 can't be reversed.	1
Understanding the conditions	1
Well i believe you can eat things in moderation.	1
Who knows in future	1
You'll have limbs amputated	1
condemed to life of pills and insulin	1
do not know	1
i don't think about it	1
not sure	1
nothing	1
overweight	1
unknown and there too many types	1

Have not felt any impact	1
Having not experienced any of the above conditions, I honestly can't say	1
Having particular foods when going out to restaurants some restaurants it's hard to pick a appropriate food	1
Having to be constantly awareof your sugar levels. This has been made much easier with the advance of sensors and readers.	1
Having to monitor BSL.	1
Having to monitor blood sugars	1
Health care checks	1
Healthcare	1
I do not know	1
I don't really think about it like that, has not affected me any of these ways	1
I don't see any impact at this time I just get on with my life	1
I have not experienced any of these so don't know	1
I haven't found any impact	1
I haven't had any complications.	1
I haven't noticed any personally	1
I haven't noticed or perceived any impact on the economy	1
I havent come across anything	1
I'm not really sure about this one.	1
I've had reason to be in hospitals in the last year and none of them cater to diabetic diet	1
If controlled, nothing should change	1
If managed properly no impact on the nation	1
In my case none	1

22. Why not?

Value	Percent	Responses
Cost	40.5%	472
I don't like technology	3.8%	44
I'm happy to fingerprint	42.8%	499
I don't like change	7.1%	83
It's too confusing	5.8%	68
		Totals: 1,166

23. For people living with type 2 diabetes, what impact would subsidised access to a continuous glucose monitor have on your glucose management and confidence in care?

Value	Percent	Responses
A large positive impact— both for my health and financially	31.0%	626
It would help me feel more confident in understanding and responding to my glucose levels.	36.0%	727
It might help, but I'd need more support to feel comfortable using technology.	11.2%	227
It wouldn't impact me much	21.8%	440

Totals: 2,020
